

Homework 6

Ethan Meltzer

I have adhered to the Honor Code on this assignment.

URL to code repo: <https://github.com/fenneltheloon/CSCI311/tree/main/HW6>

URL to application: <https://everwild.dev/CSCI311/form.php>

Things to try/features:

- Keyword search is a *full-text* search over the entire database, using `fts5`.
- Date search returns correct ranges
- Materials/Techniques form autocompletes
- All others perform wildcard search in their respective columns

All searches are case-insensitive.
